

Peninsula Regional Medical Center

Peninsula Regional Medical Center (PRMC) is realizing significant benefits from AeroScout's Healthcare Visibility solutions. PRMC is leveraging its Wi-Fi network throughout its campus for a variety of use cases and applications such as Preventive Maintenance, Recall Management, Par Level Management, Shrinkage Control, Asset Utilization and Temperature Monitoring.

We are receiving significant clinical and financial benefits from our AeroScout solutions. As examples, our staff can spend more time on patient care thanks to the efficiency provided, and we initially saved an estimated \$250,000 by avoiding the purchase of many infusion pumps. The AeroScout solutions are so important and easy to use that we made sure everyone at PRMC, including our CEO, has access to the applications.

Mark Cornelius, Biomedical Department Director, PRMC
